n.d. - not detected. LoQ - limit of quantitation of the method - equal to Reporting limit - (the concentration of a substance at which quantitative results can be reported with a high degree of confidence for the given analytical procedure). LoD - limit of detection of the method (the lowest concentration of a substance that can be distinguished from the absence of that substance for the given analytical procedure).

Reference of limits is made for informational purposes only and does not constitute a statement of conformity.

¹Limits according to: Reg.EU 2104/2022 as in force today.
